The changing size of the state (coalition plans)

The changing size of the state (coalition plans)

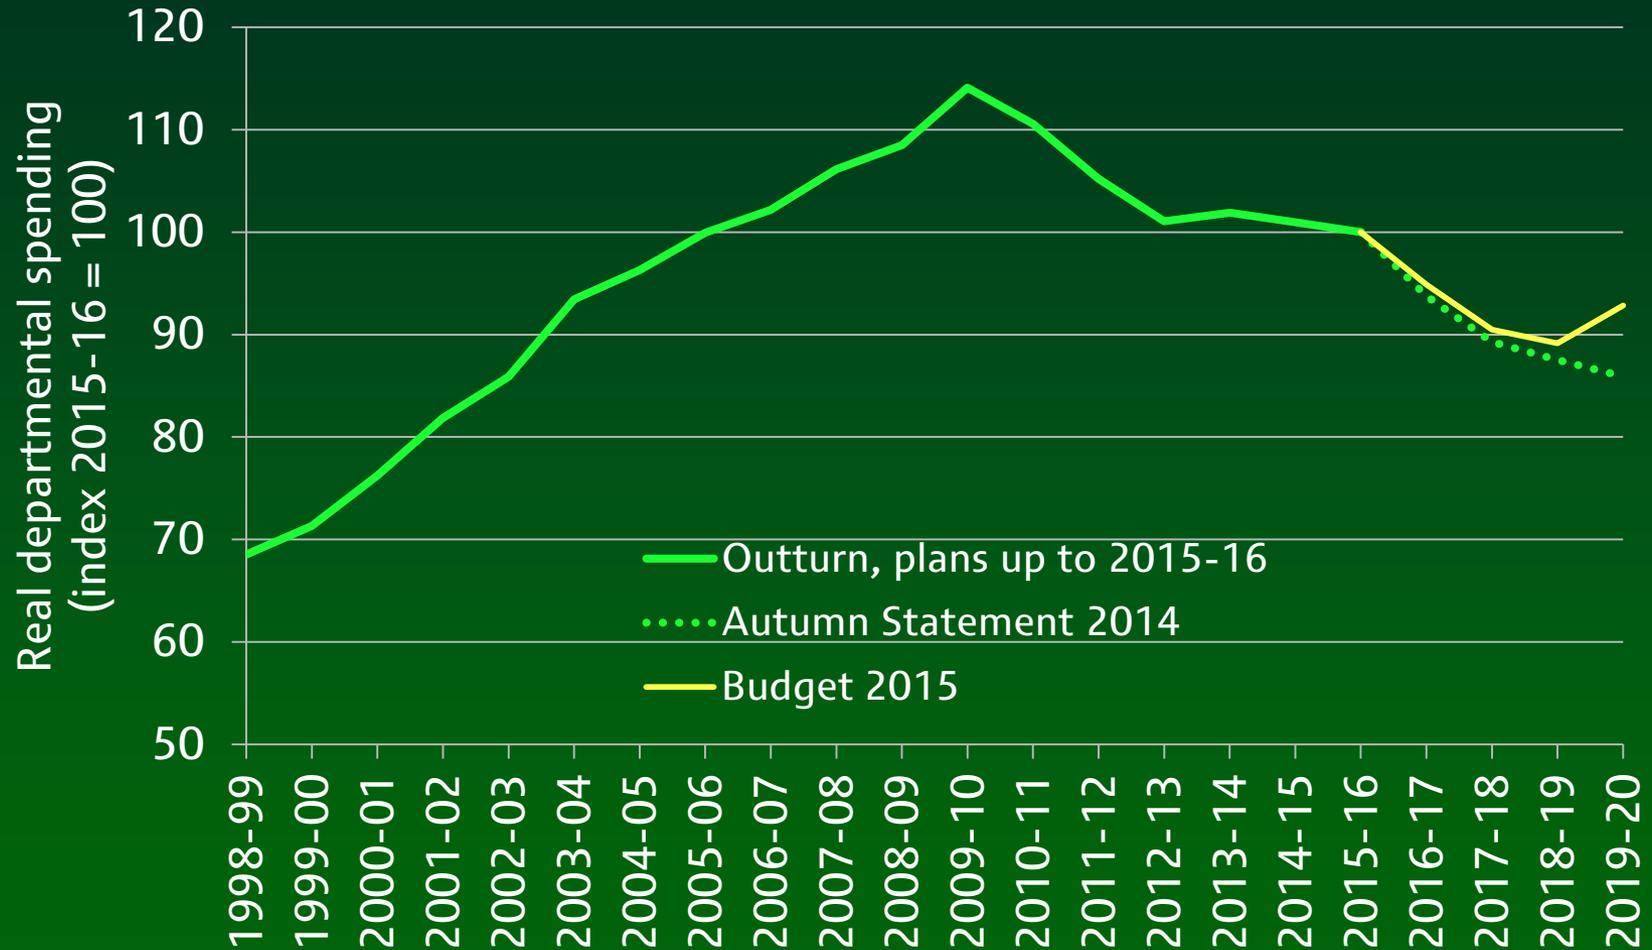

Departmental spending

9.7% cut 2010-11 to 2015-16

AS2014: 14.1% cut 2015-16 to 2019-20

B2014: 7.2% cut 2015-16 to 2019-20

£30bn of cuts by 2017-18?

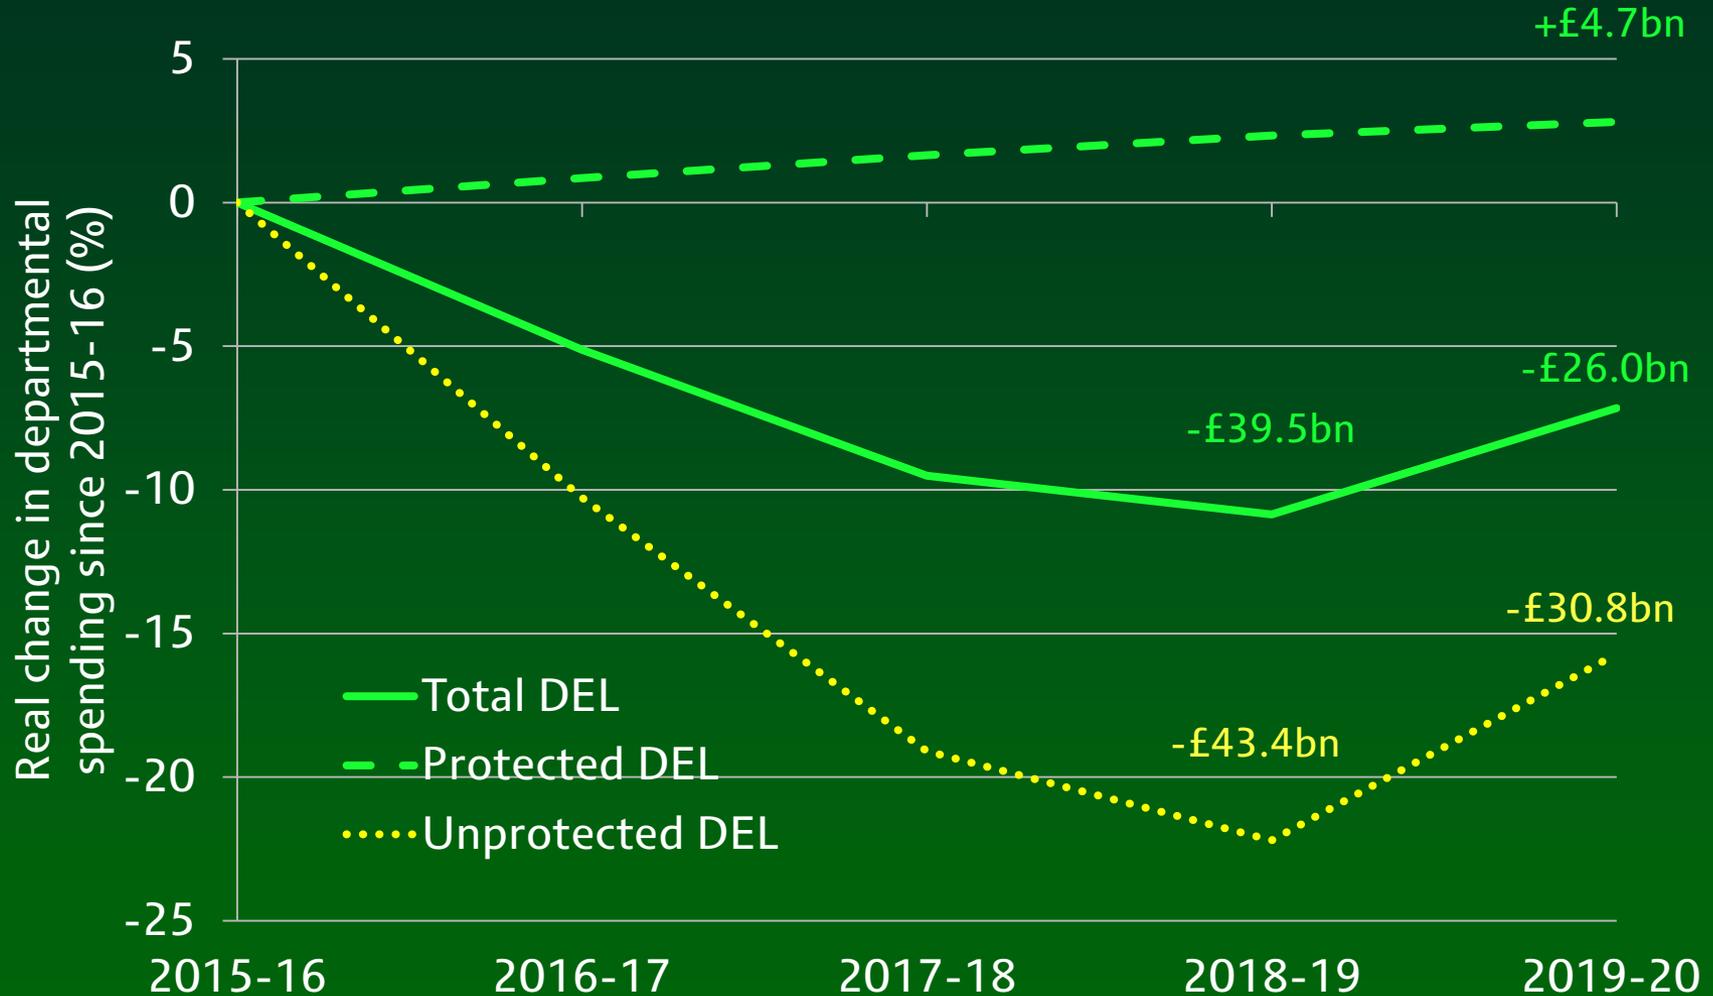

- Coalition plans imply a £30.5bn cut to TME less debt interest between 2015-16 and 2017-18
- George Osborne has said that he would achieve this in a different way to coalition plans
 - £12bn/£5bn/£13bn of welfare cuts/tax avoidance measures/DEL cuts
- Coalition plans imply £34.6bn of DEL cuts up to 2017-18
 - Other areas of spending are rising over the period
 - So £12bn of welfare cuts and £5bn of tax avoidance would require closer to £18bn of DEL cuts
- Liberal Democrats want £9bn smaller tightening, £12bn tax rises, £3.5bn welfare cuts, leaving roughly £10bn of DEL cuts
- Labour: profile less clear, rolling mandate currently requires current balance in 2017-18, but 2018-19 by post-election budget

Departmental spending up to 2019-20

- Budget plans imply 0.3% GDP surplus and assume no further tax/social security changes
 - Assume implement Simon Stevens' recommendations for NHS spend
 - Assume ODA increases with GDP
 - Assume protect cash schools spend per pupil (in line with Conservative pledge)

Departmental spending

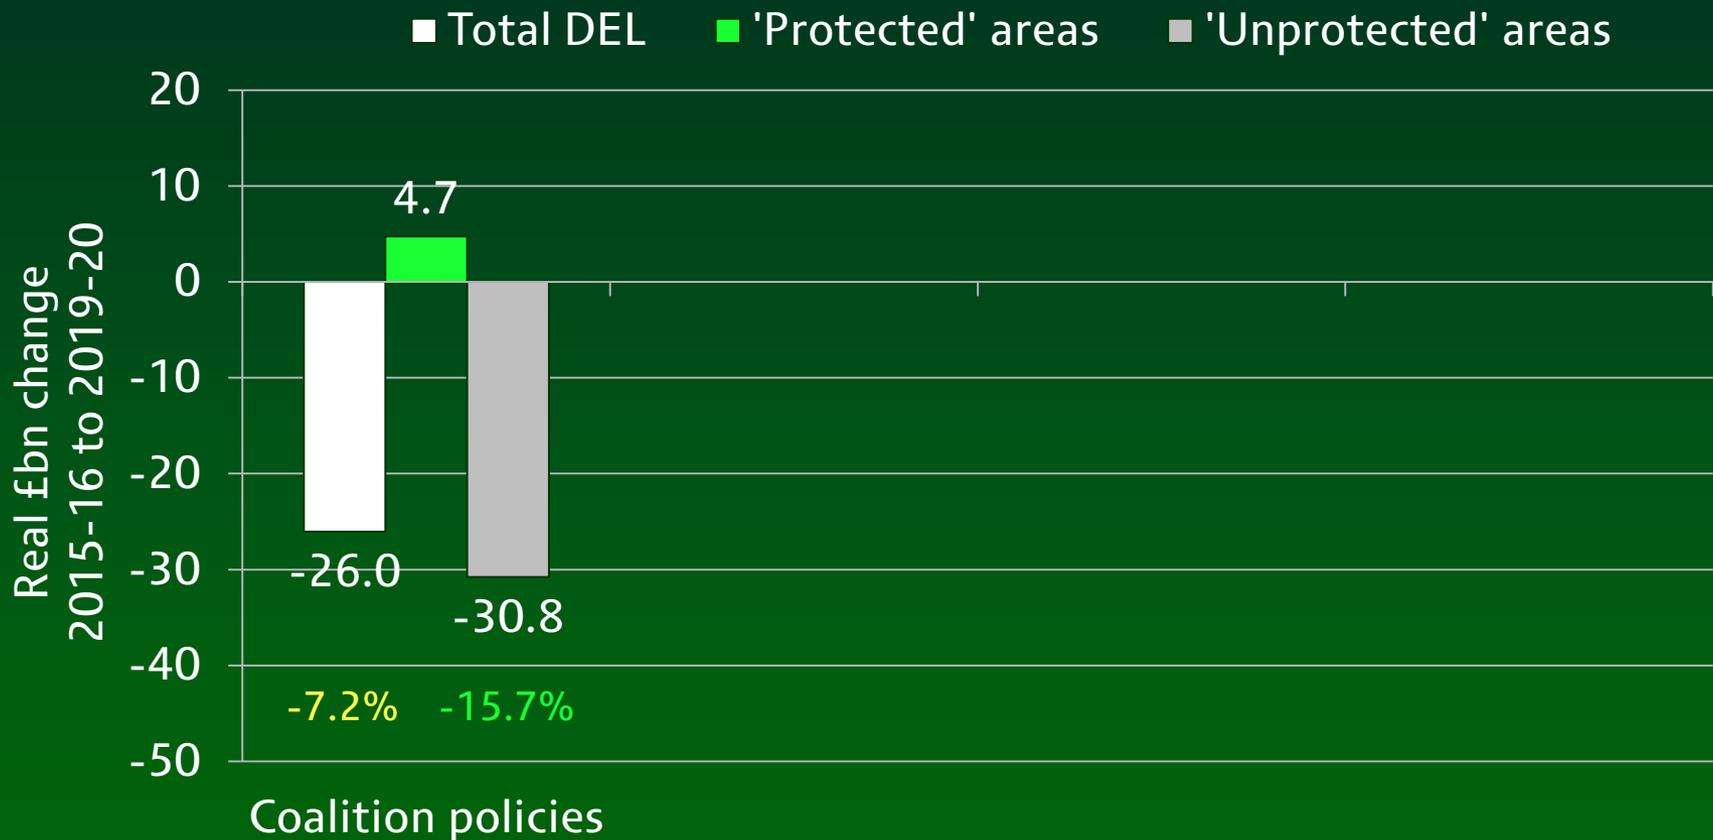

Protected departments include NHS England, schools and Official Development Assistance

Institute for Fiscal Studies

Departmental spending 2015-16 to 2019-20

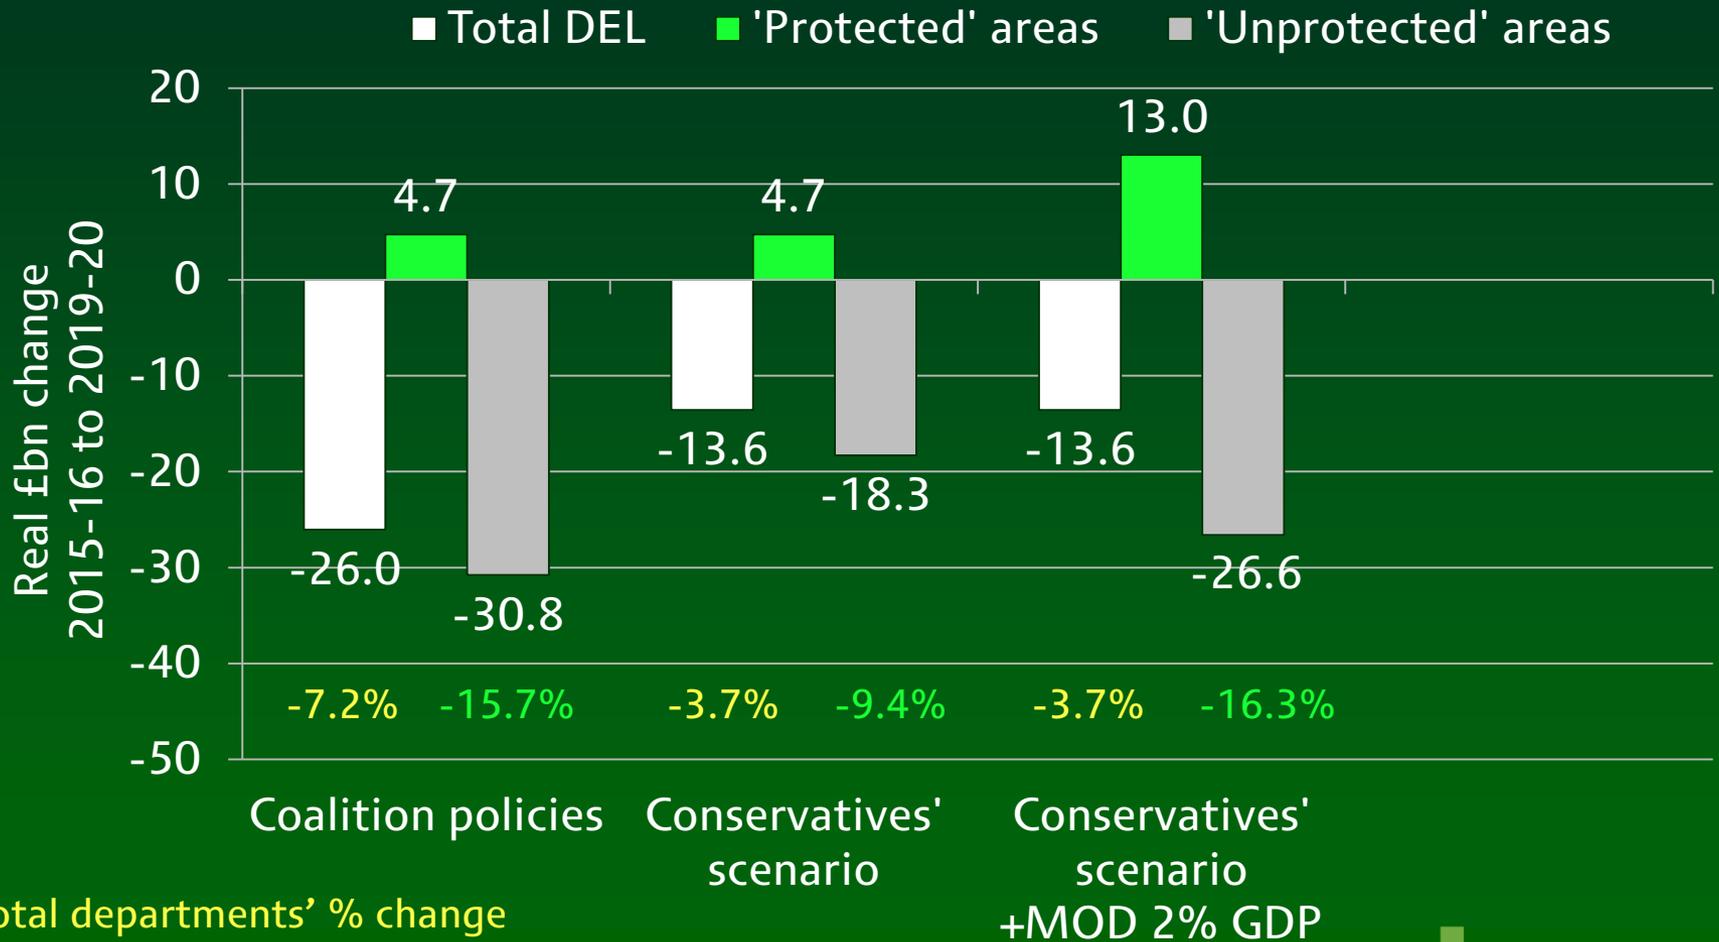

Total departments' % change

Unprotected departments' % change

Cuts up to 2019-20?

- Budget plans imply 0.3% GDP surplus and assume no further tax/social security changes
 - Assume implement Simon Stevens' recommendations for NHS spend
 - Assume ODA increases with GDP
 - Assume protect cash schools spend per pupil
- Conservatives committed to budget balance in next parliament
 - Aspiration for £12bn social security cuts (largely unspecified)
 - Proposed personal tax cuts of around £6bn
 - Excluding £5bn of avoidance (no details given and other parties would implement)

Departmental spending 2015-16 to 2019-20

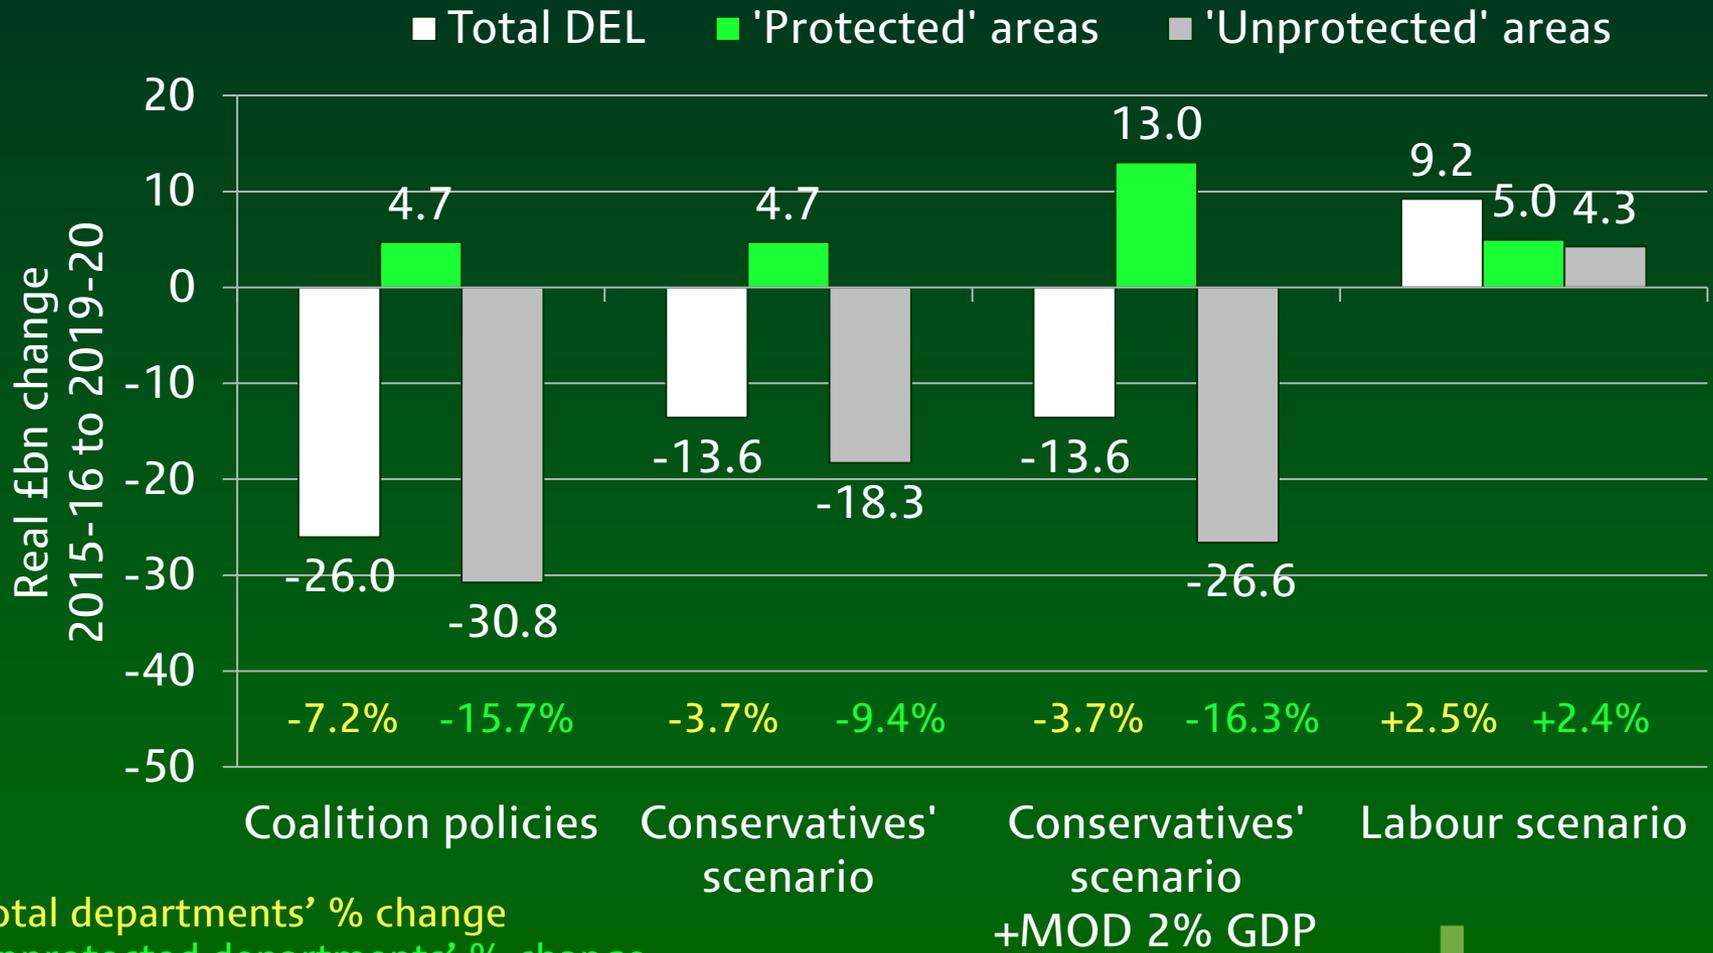

Total departments' % change
Unprotected departments' % change

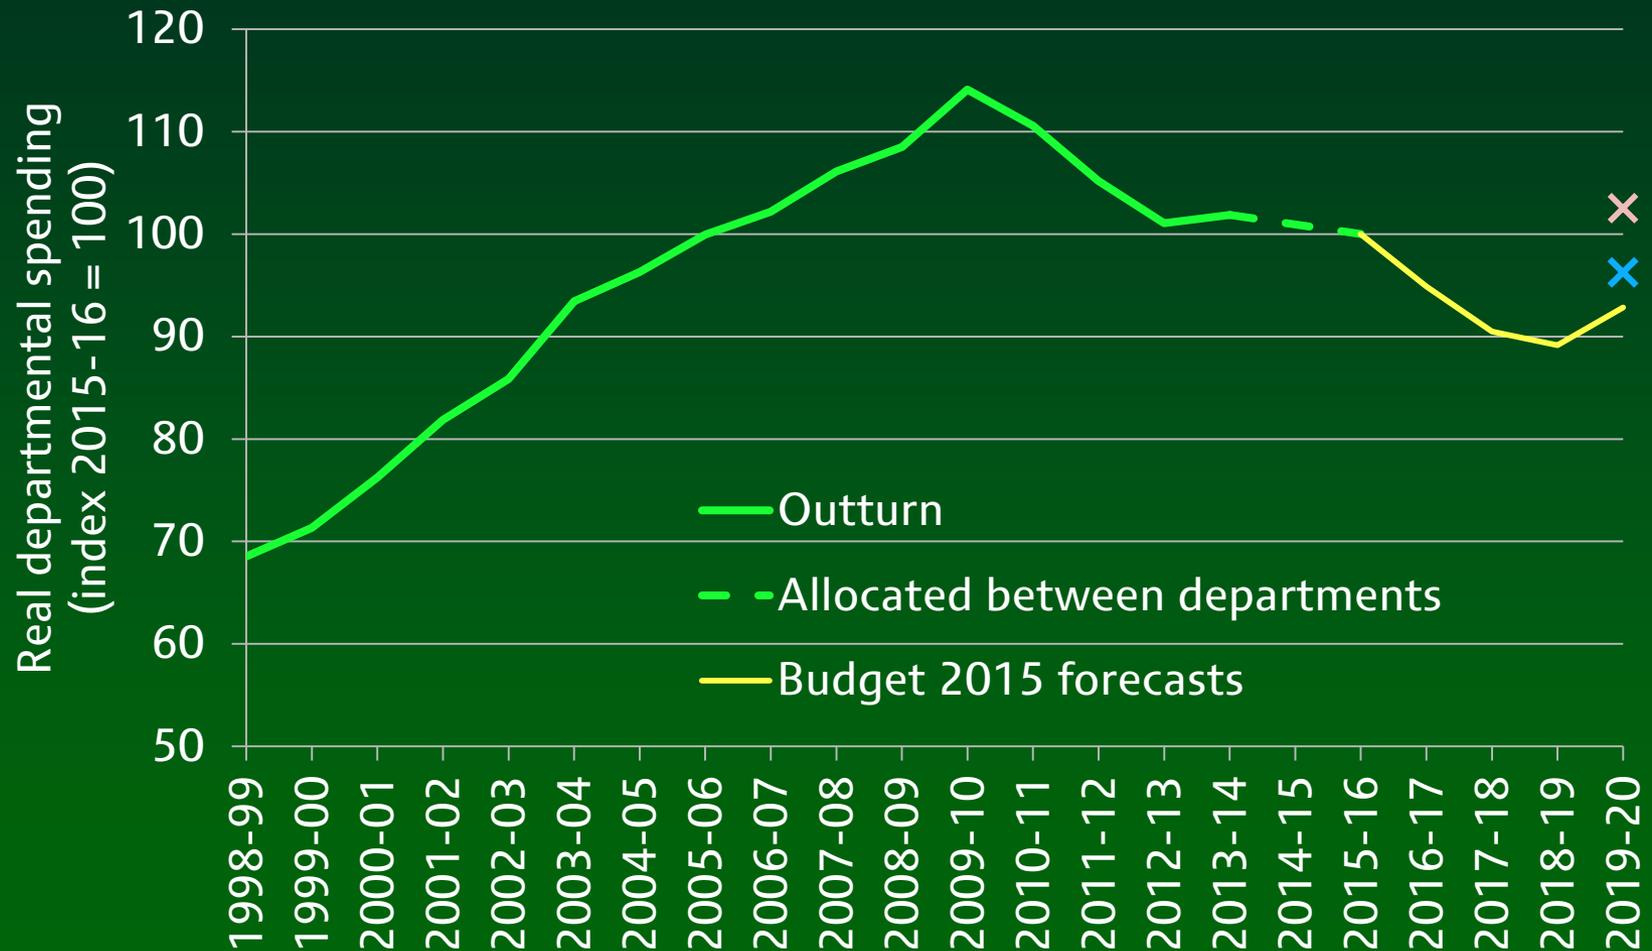

Policies beyond 2015-16

- Budget plans imply 0.3% GDP surplus and assume no further tax/social security changes
 - Assume implement Simon Stevens' recommendations for NHS spend
 - Assume ODA increases with GDP
 - Assume protect cash schools spend per pupil
- Conservatives committed to budget balance in next parliament
 - Aspiration for £12bn social security cuts (largely unspecified)
 - Proposed personal tax cuts of around £6bn
- Labour committed to current budget balance by end of parliament
 - Net tax and benefit takeaway £1.2bn (mansion tax)
 - Protection for entire education budget

Departmental spending 2015-16 to 2019-20

Departmental spending

Pressures on departments

- Ending contracting out increases public sector employer NICs (£3.7bn)
- Higher contributions to public service pension schemes (£1.1bn)
- Dilnot social care funding (£1.0bn)
- Tax-free childcare (£0.8bn)
- Mental health funding (£0.3bn)

- Public sector wage pressures as private sector wages start to increase
- Pressures of a growing and ageing population on demand for public services

Summary

- Coalition plans imply £26bn cut from departments
 - £40bn cut to 2018-19 followed by an increase
 - Compares to £39.0bn 2010-11 to 2015-16
- Reversed plan to cut departmental spending in 2019-20, leading to a ‘roller-coaster’ profile
 - But real terms increases would always have started at some point
- Conservatives could cut by less: £13.6bn to 2019-20
- Labour could *increase* departmental spending by £9.2bn up to 2019-20
- Borrowing and therefore debt would fall by end of parliament under all three main UK parties, but fastest under Conservatives
